ProLine Radiant products have been featured on the DIY Network and in the Wall Street Journal.

*The Trusted Radiant  
Heat Provider  
for Construction  
Professionals.*

## About ProLine Radiant

### General Information - Products and Services

ProLine Radiant is a leading international provider of interior and exterior radiant heat solutions. Our wide selection of products and unsurpassed customer services have established ProLine as the trusted radiant heat solutions provider. From large commercial applications to custom residential projects, ProLine Radiant has the top products, services and professional staff to provide the ideal radiant heat solution.

#### **ProLine Solutions Include:**

- Industrial, Commercial and Residential Solutions
- Snow and Ice Melting
- Radiant Floor Heating
- Roof Deicing and Gutter Trace
- Pipe Tracing
- System Design and Engineering
- Installation Support and Training
- Electric and Hydronic Radiant Solutions

ProLine Radiant includes complete engineering and design services with each system. You'll find our professional staff to be extremely knowledgeable, friendly, and responsive. From project inception to completion, we will work with you to ensure that all your project needs are met.

#### **The Complete Solution and Best Value**

ProLine Radiant offers more than the latest industry-leading radiant heat products. We partner with you to install the best radiant heat system for your needs and budget. In addition to top quality products, ProLine includes unmatched system design/layout and engineering services, as well as expert installation training and support.

Our superior customer and installation services are why ProLine has gained its reputation as a trusted provider of radiant heat solutions. When it comes to the complete radiant heat solution, you won't find a wider selection of proven products or a more knowledgeable, helpful and friendly staff.

*"The staff at ProLine was by far the most professional, responsive and knowledgeable of all those with whom I dealt."*

Benson R. - TileMaster (Business Owner)

ProLine makes the process of selecting, purchasing and installing a radiant heat system as seamless as possible.

Our expertise and superior service are just some of the reasons why construction professionals and homeowners alike consistently choose ProLine.

*ProLine is with you every step of the way, from initial consultation and project analysis to purchase, system design and installation.*

#### **Summary of Benefits**

Call a radiant heat expert at ProLine for a free consultation. Or visit ProLine Radiant online ([www.GBRadiantHeat.com](http://www.GBRadiantHeat.com)) and then call us toll free at 508.379.6038 to learn more about your radiant heat options.

- Free Consultation and Analysis with an Experienced, Unbiased Radiant Heat Expert
- Wide Selection of Proven Products
- Complete System Design (AutoCAD) and Engineering Services
- Industry Leading Electric and Hydronic Radiant Heating Solutions
- Post-sales Technical Support
- Expert Installation Support
- Professional Training
- Free Quote Services

Contact your local wholesaler. If they don't carry ProLine products, be sure to ask them to!

To receive a radiant heat quote, or design, contact your local wholesaler or visit [www.GBRadiantHeat.com](http://www.GBRadiantHeat.com). Or for more information, call ProLine Radiant at 508-379-6038 today.

To submit your project for a design/quote, call 508-379-6038

# Professional System Design, Installation Training, and Technical Support Services

## Industry Leading Customer Services

What truly differentiates ProLine Radiant from the competition is its customer service. In addition to its experienced design team providing detailed AutoCAD layouts, ProLine offers free installation training courses with certificates of completion. And should you need, ProLine electricians and designers are also on hand to provide technical support during the installation process. We work with you every step of the way to make the process of installing a radiant heat system as easy as possible.

### Professional Design Services

ProLine custom designs each radiant heat system to ensure it meets each project's specific needs. The AutoCAD layouts contain all the specs and information necessary, so you'll know all the technical information, including load calculations, breaker sizes, number of breakers, etc., prior to any installation taking place.

### ProLine Radiant Training Services

A radiant heating system is only as good as the installation, which is why ProLine provides a valuable installation training program. ProLine's professional training services include courses on radiant snowmelt, roof deicing and floor heating system installation.

Installers who successfully complete the training receive a dated certificate from ProLine, documenting their knowhow in radiant heat installation. Subsequently, ProLine can recommend your business if a customer in your area is interested in installing a radiant heat system.

### Installation Support Services

ProLine Radiant's installation support services further distinguish it from other manufacturers and wholesale distributors. ProLine Radiant provides a dedicated staff of experts to assist you throughout the installation process if you need. This valuable resource gives your business a wealth of expertise to draw from and helps to ensure timely, successful installations - and repeat business.

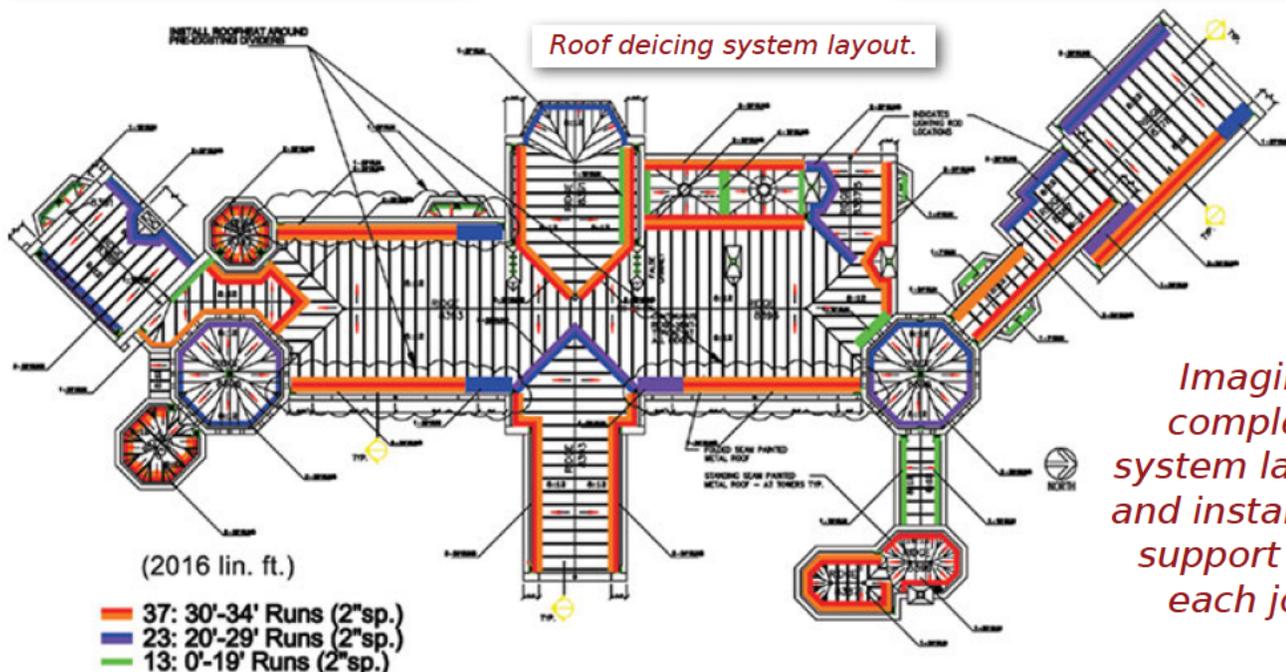

*ProLine offers free installation training as well as professional design/layout services and installation support.*

When you work with ProLine, you are partnering with experienced professionals who stand beside you throughout the purchase, design, and installation process. Our goal is to make the installation of radiant heat as easy as possible for you and ensure the success of your business. Enhance your bottom line with peace of mind by utilizing the trusted services and expertise of seasoned professionals whose goal is your success.

RADIANT SNOWMELT SYSTEMS

**Green Build**  
Radiant Heat Solutions

# ProLine

RADIANT HEAT SOLUTIONS  
Heated Driveways and Snow Melting Systems

Fully automated, maintenance-free ProLine snow melting systems have proven to be the optimum solution for heating commercial parking ramps, driveways, sidewalks, loading docks and more. Versatile and durable, ProLine heat cable is designed to withstand the stress of heavy concrete pours and brick and stone paver applications as well as the extreme temperatures of hot asphalt installations. The snow melting cable is available on the spool or pre-spaced in mats for easy “roll-out” installation. The performance and reliability of electric snowmelt systems have made ProLine Radiant a favorite among wholesalers and professional builders alike.

## Features Include:

- Available on the spool or pre-spaced in mats.
- Single-point connection simplifies installation.
- Twin-conductor cable.
- Flexible installation; easy to customize.
- Durable and versatile - Designed for use in concrete, under pavers, and hot asphalt applications.
- Silent, efficient and safe.
- Maintenance-free operation.
- All mats heat 2-feet wide. Power leads are 16.4 feet in length.
- 10-year limited warranty against manufacturing defects.

## ProLine Mats and Cables Specifications

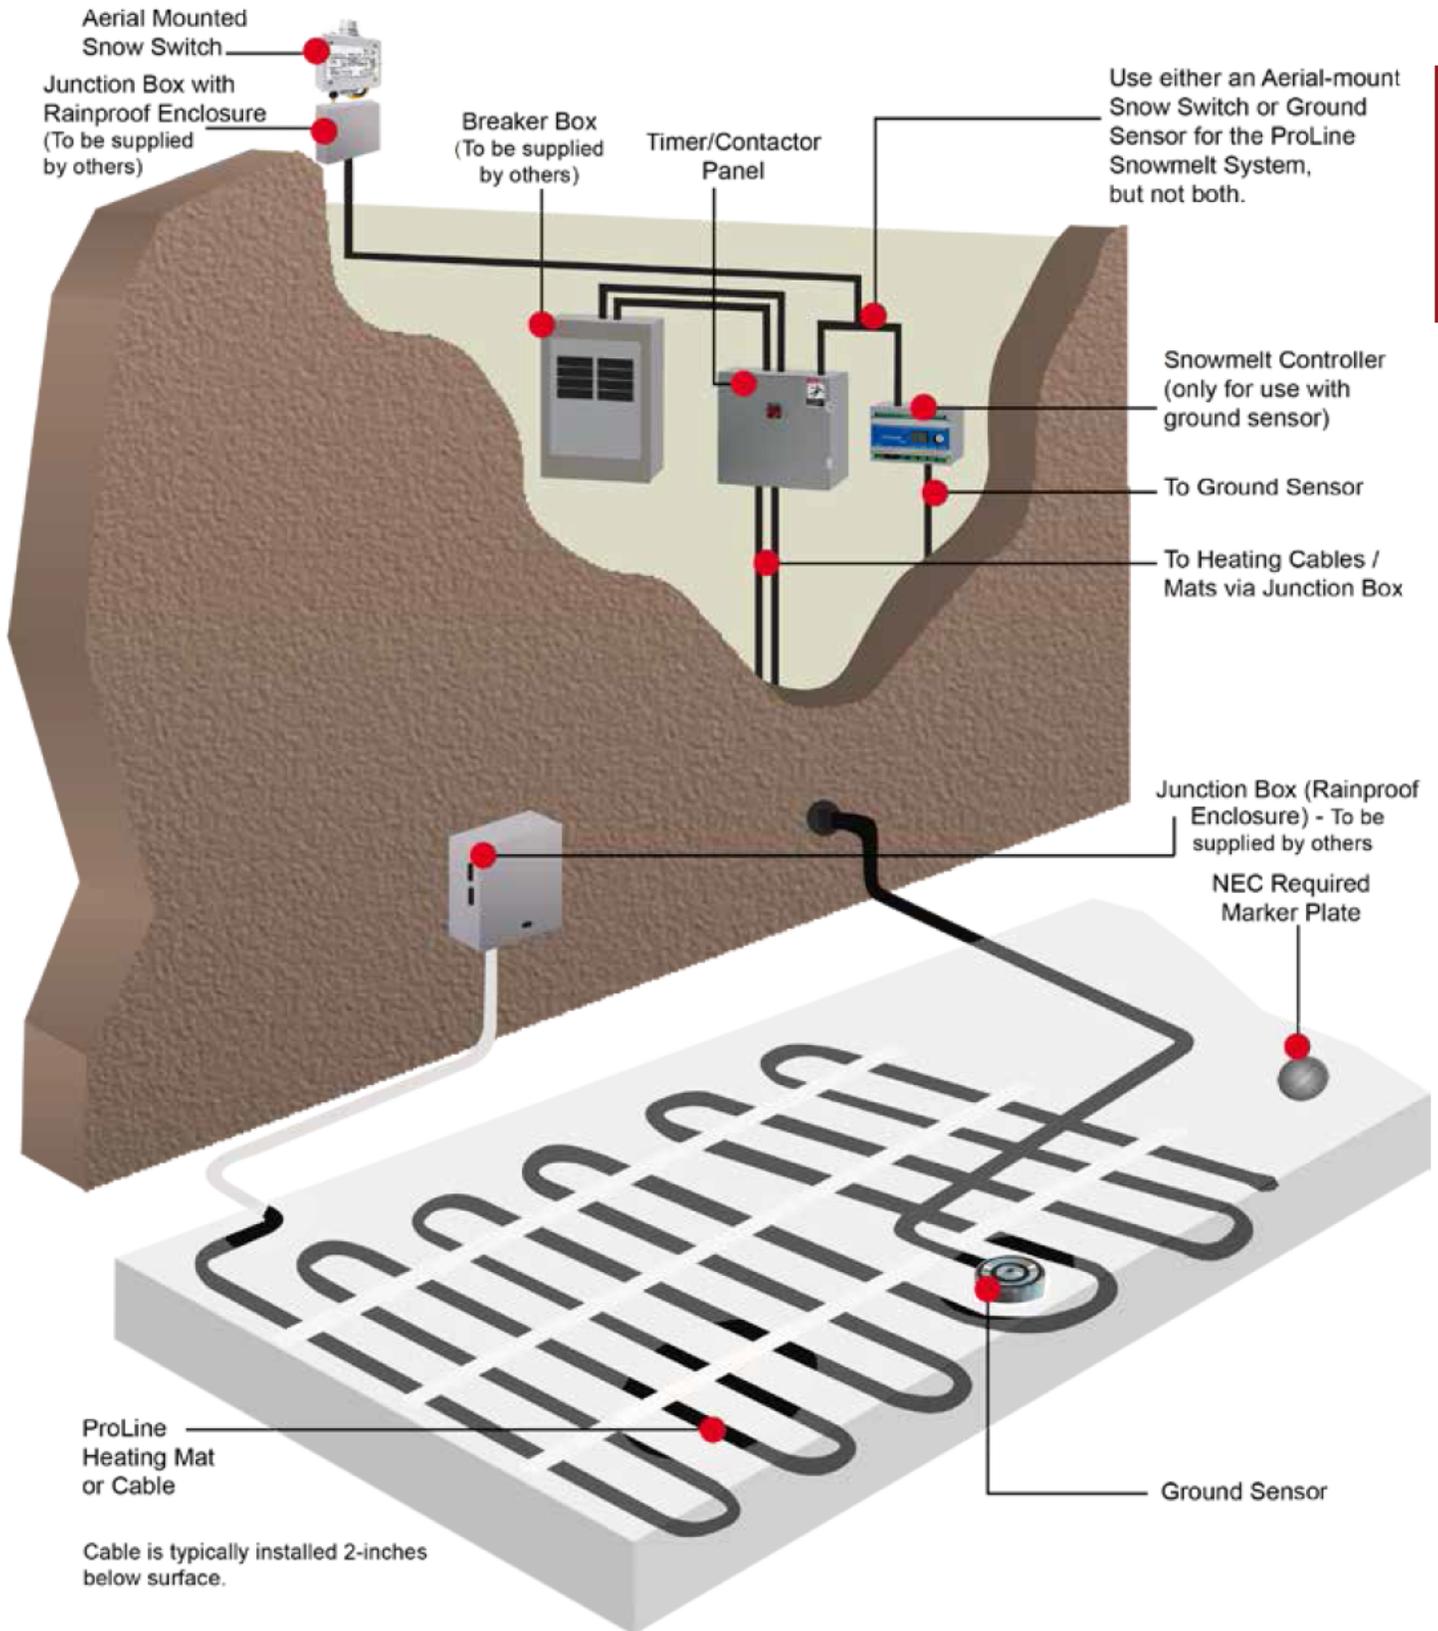

Cable construction	Twin conductor
Rated voltage	120-600 V (For 120, 208, 277, 600 V, please call.)
Output (mats)	37W/ft. <sup>2</sup> and 50W/ft. <sup>2</sup>
Output (cables)	12W/ft. (40W/m) with cable, 24-70W/ft. <sup>2</sup>
Cold lead	16.4 feet (5.0 m) Longer cold leads available on request.
Bending radius	Minimum 2 inches, (51 mm)
Cable diameter	¼ inches (7 mm)
Conductor insulation	Fluoropolymer
Metal sheath	Copper
Outer sheath	Polyolefin
Max. external jacket asphalt temperature *	220°F (105°C) *[460°F (240°C) for up to 10 minutes]
Max. external jacket temp.	158°F (70°C)
Max. conductor insulation temperature	302°F (150°C) Concrete and pavers
Min. installation temp.	5°F (-15°C)

# ProLine Snow Melting System Overview

Snow Melting

## Exterior Radiant Heat Controls

### ProLine Offers Contactor Panels with GFEP

In keeping with its commitment to provide professional builders with the best products, service and convenience, ProLine Radiant offers GFEP (ground fault equipment protection) breaker panels with its snowmelt systems, which can save installers time and money.

Designed for radiant snow and ice melting applications, the ProLine Radiant contactor panel with GFEP simplifies your installation and minimizes costs. The UL listed panels feature a NEMA 4 enclosure, terminal connection block, two or four 3-pole contactors, and wiring diagram.

The panel should be used in conjunction with the in-ground snow sensor/controller or the aerial-mount snow switch (see pages 13-15).

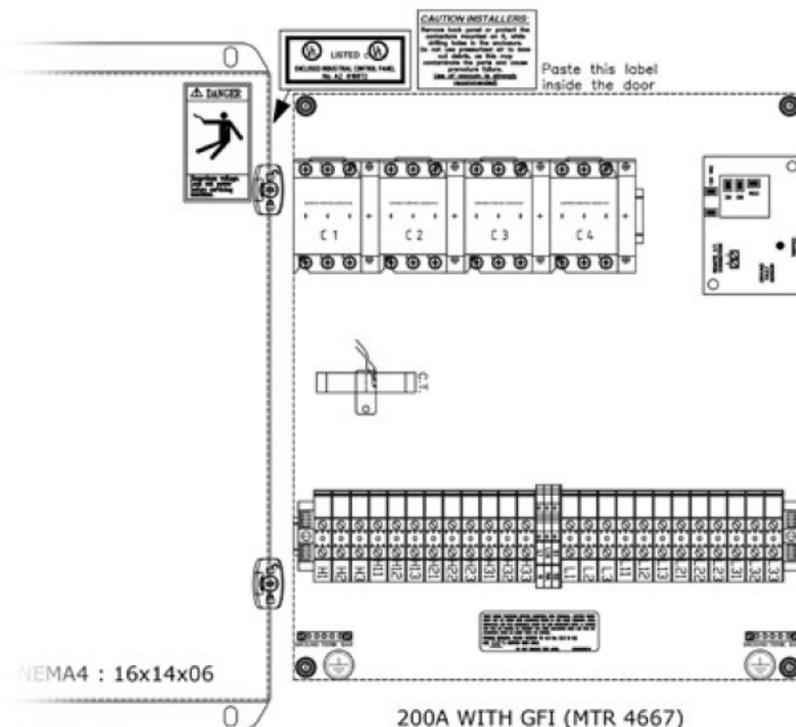

*NEMA 4X contactor panel available upon request.*

### Features and Benefits

- NEMA 4, UL listed panel box
- Low cost
- Easy to install
- Integrated 30mA GFEP (optional)
- LED trip indicator (internal)
- LED "heat on" indicator light
- Pre-wired terminal connections
- 120 V on/off remote heat indicator
- 2-year warranty

*Contactor panel front.*

## Exterior Radiant Heat Controls

### Snowmelt System Controller

The ProLine Radiant snowmelt control units are NEMA 1, wall-mounted control panels. The approximate size of the control unit is only 6 x 3½ inches. It is even possible to control the unit from an external signal (day/week timer, GSM-module or other signal source). The controller also features manual override capability, allowing you to activate the system to melt snow drifts or ice that has formed due to wind or shade.

#### ProLine Control Unit

The ProLine Radiant controller is designed for ice and snow melting in gutters and ground areas. Using readings from temperature and moisture sensors, the controller ensures economical control of power consumptions when keeping outdoor areas and roofs free of ice and snow.

Despite the compact control unit's advanced technology, superior performance and ease of use, it also represents a breakthrough in that it is significantly more affordable than most other industry

controllers. The unit provides maintenance-free, energy-efficient, UL listed snow melting for all types of residential and commercial applications.

#### ProLine Snowmelt Controller Technical Data

Supply voltage	120/230 V ±10%, 50-60 Hz
Temperature range	32°F to 122°F (0 to 5°C)
Working range	-4°F to 41°F (-20 to 5°C)
Built-in timer for manual snow melting / after run	1-6 hours
Output relay	3 x 16A potential free relay
Two zone application	Output is 2 x 16A potential free relay
Water-based system	Controlling a 3 or 4 way valve, primary pump, secondary pump.
Display	Graphic and with back light
Ambient temperature	32°F to 122°F (0°-50°C)
Housing (including cover)	IP20
Weight	1.09 lbs. (495 g)
Dimensions (excluding cover)	H: 3.5" W: 6.1" D: 1.7" (90 mm x 156 mm x 45 mm)
Dimensions (including cover)	H: 6.7" W: 6.4" D: 1.7" (170 mm x 162 mm 45 mm)
LEDs indicate the functions: ON/green; ERROR/red	Supply voltage to the thermostat; fault indication

Technical Data for ProLine In-Ground Sensors	
Detecting	Moisture and temperature
Mounting	Any outdoor area
Housing	IP68
Ambient temperature	-4°F to 158°F (-20 to 70°C)
Cable length	33 feet (10 meters)
Dimensions	H: 1¼-2.4 inches (32 mm-60.9 mm)

#### Ground Sensor for Temperature and Moisture

Designed for embedding into the surface of concrete, asphalt, pavers or other outdoor surfaces, ProLine Radiant's in-ground snow sensor detects ground temperature and moisture for automated snow melting systems. The activation device only signals the controller to activate the system when the outdoor temperature is below the selected setting (usually 39°F) and snow or ice occurs on the sensor head.

The snow sensor is usable for all applications within hydronic as well as electrical radiant heating. Optimal operation is ensured because of the output control, which makes the system both effective and economical.

*In-ground snow sensor (and sensor cup) for automated snow melting system.*

## ProLine System Activation Devices (Snow Sensors)

ProLine Radiant snowmelt systems come standard with an aerial or ground-mounted snow sensor switch. The advanced device automatically activates the ProLine snow melting system when it detects precipitation and temperatures are below a set point. The temperature is typically set at 39°F, but is adjustable from 34°F (1.1°C) to 44°F (6.6°C). Smart system compatible, the aerial sensors have several other notable features, including adjustable delay off cycle and upgradeable remote activation.

**The WS-2C Aerial Snow Sensor** - Designed for snow and freezing rain detection, the WS-2C aerial snow sensor sets the standard for automated radiant snowmelt systems. The snow sensor activates the snow melting system when moisture is present and the temperature reaches the set point (usually 39°F), providing fully automated, efficient snow and ice melting.

The unit is easy to install and all the electronics can be accessed by simply removing the four front cover screws.

Reliable Rain and Snow Detection  
Adjustable Delay Off Cycle  
Easy Installation & Full Access to Electronics  
Adjustable Temp. Trigger Point (34°-44°F)  
Smart "Manual On" Operates for one Delay

Full 30A @ 240 VAC Control  
Field Strap for 100-120 / 200-240 VAC Operation  
Selectable Low-Temperature Cutoff  
Replaceable Remote Precipitation Sensor  
Housed in a two-gang PVC enclosure

**The WS-5C Aerial Snow Sensor** - The WS-5C is essentially a WS-2C fitted with a dual 30A @ 240 VAC load control contact set. It is primarily designed for larger satellite antenna/broadcast tower deicing and pavement snow melting applications. Specifically, any job that a WS-2C can perform, a WS-5C can perform with double the load handling capability. The unit is housed in a two-gang PVC enclosure. The overall dimensions of the WS-5C are 4¾" x 7" x 2¾" (120 mm x 178 mm x 70 mm). The unit weighs 2 pounds. The user may access all electronics by removing the four front cover screws.

Reliable Rain and Snow Detection  
Adjustable Delay Off Cycle  
Easy Installation & Full Access to Electronics  
Adjustable Temperature Trigger Point  
Smart "Manual On" Operates for one Delay

Dual 30A @ 240 VAC Control  
Field Strap for 100-120 / 200-240 VAC Operation  
Selectable Low-Temperature Cutoff  
Replaceable Remote Precipitation Sensor  
Housed in a two-gang PVC enclosure

**The WS-8C Aerial Snow Sensor** - The WS-8C is primarily designed for gutter, downspout, and roof ice melting and small satellite antenna deicing. The totally sealed, low voltage, remote mount precipitation sensor allows the user to install the small sensor head in a downspout, the bottom of a gutter, or at the end of an antenna boom, up to 10 feet away, while keeping the main controller in a more convenient or protected location.

Reliable Rain and Snow Detection  
Adjustable Delay Off Cycle  
Easy Installation & Full Access to Electronics  
Adjustable Temperature Trigger Point  
Bright Off/On/Triggered LED Status Indicator

Full 30A @ 240 VAC Control  
Field Strap for 100-120 / 200-240 VAC Operation  
Safe Low-Voltage Sensor Head  
Replaceable Remote Precipitation Sensor  
Smart "Manual On" Operates for one Delay Cycle

**The WS-AUX Control Panel** - The WS-AUX control display panel is used in conjunction with a WS snow sensor controller. The sensor is typically mounted on a roof, near a gutter, or in a similarly difficult location to reach. The WS-AUX provides a method of remotely monitoring and controlling the attached sensor. The user may monitor both the operating mode and the activation state of the sensor. The user may also set the sensor to prohibit automatic operation, to automatically operate, or to manually operate one snow melting cycle, then return to automatic operation. The WS-AUX derives its power from the snow sensor and requires no batteries or AC power. With an operating temperature range of -40°F to 185°F (-40°C to +85°C) the WS-AUX is designed for use either indoors or outdoors with proper protection from the elements. The overall dimensions of the WS-AUX are 4.1" x 1.8" x 0.9" (104 mm x 45 mm x 23 mm).

# ProLine Snowmelt System Activation Devices

## Technical Data and Specifications

WS-2C Specifications	
Dimensions	4¾"x7"x2¾" (120 mm x 178 mm x 70 mm)
Weight	2 lbs. (0.9 Kg)
Operating temperature	-40° to 185°F (-40° to 85°C)
Enclosure rating	NEMA 3R
Supply power	100-120 VAC / 200-240 VAC Field selectable 15 W maximum
Trigger temperature	34° to 44°F (1.1° to 6.6°C) Field selectable
Delay off (sensor)	2 Minutes
Delay off (controller)	30-90 Minutes field selectable
Load contact capacity	30A @ 240 VAC / 100,000 Operations at full load
Monitor contact capacity	24 VDC/VAC 400mA 10 W Total

WS-5C Specifications	
Dimensions	4¾"x7"x2¾" (120 mm x 178 mm x 70 mm)
Weight	2 lbs. (0.9 Kg)
Operating temperature	-40° to 185°F (-40° to 85°C)
Enclosure rating	NEMA 3R
Supply power	100-120 VAC / 200-240 VAC Field selectable 15 W maximum
Trigger temperature	34° to 44°F (1.1° to 6.6°C) Field selectable
Delay off (sensor)	2 Minutes
Delay off (controller)	30-90 Minutes field selectable
Load contact capacity	2x30A @ 240 VAC / 100,000 Operations minimum at full load
Monitor contact capacity	24 VDC/VAC 400mA 10 W Total

Example of a ProLine aerial-mount snow sensor and junction box.

WS-8C Specifications	
Dimensions	4¾"x7"x2¾" (120 mm x 178 mm x 70 mm)
Weight	2 lbs. (0.9 Kg)
Operating temperature	-40° to 185°F (-40° to 85°C)
Enclosure rating	NEMA 3R
Supply power	100-120 VAC / 200-240 VAC Field selectable 15 W maximum
Trigger temperature	34° to 44°F (1.1° to 6.6°C) Field selectable
Delay off	30-90 Minutes field selectable
Load contact capacity	30A @ 240 VAC / 100,000 Operations minimum at full load

## ProLine WS-AUX Snow Sensor Control/Display Panel

The WS-AUX control display panel brings control and monitoring of your snowmelt system indoors. No need to hope that the system has successfully triggered. One glance at the WS-AUX confirms it.

The WS-AUX is compatible with the WS-2C, WS-5C, and WS-8C rain/snow sensor controllers. The unit consists of an electronic printed circuit board mounted securely to a steel mounting plate. The WS-AUX weighs 2.5 ounces and fits into a standard single-gang or multi-gang electrical enclosure. Compatible self-threading mounting screws that fit both metal and plastic enclosures are included. The plate also has mounting holes for a rectangular "modular" cover plate. This allows the user to select a cover plate color and material that blends with the decor of the room.

The WS-AUX provides three push-button switches; STANDBY, AUTOMATIC, and MANUAL ON.

The respective LED indicators for each control reflect the current operating mode of the snow sensor. To save energy, the LED indicators blink periodically rather than remaining steadily illuminated. Pressing STANDBY will set the connected snow sensor to ignore snowfall and prohibit automatic operation of an attached snowmelt system. This function can be used to save energy if snow melting is not critical (i.e., driveway, sidewalk) and is not required for an extended period of time (vacation home, remote location). Pressing AUTOMATIC will set the connected snow sensor to automatically activate and control an attached snowmelt system when snow is detected.

# PROLINE SNOW MELTING MATS AND CABLE ORDERING INFORMATION \*

The ProLine snow melting system includes heating cable or a mat that is pre-spaced and taped into a 3- or 4-inch on-center-mat that allows for simple roll-out installation. All mats heat 2-feet wide. Power leads are 16.4 feet in length. (\* The most commonly ordered snow melting cable sizes are listed below. To order 120, 208, 277, 600 V, and other size mats and cables, please contact your ProLine representative.)

## Snow Melting Mats

### 240 Volt Mat (50 W per square foot)

Item Number	Heated Area (Sq. ft.)	Mat Length (Feet)	Watts	Amps	Ohms

# Heat Trace Cable

SELF-REGULATING ROOF  
AND PIPE TRACING CABLE

# Why ProLine Heat Trace Cable?

ProLine self-regulating heat cable features a more flexible outer jacket and more durable carbon core than other leading brands of self-reg cable. These features provide more consistent performance, longer lifespan, and easier installation in cold temperatures.

## Key Features of ProLine Self-regulating Heat Cable vs. Other Cable Brands

### Outer Jacket Quality

#### Typical Self-regulating Heat Cable

The outer jacket of typical self-reg cable tends to “bubble” or separate from the cable core when the cable is manipulated for turns. These irregularities create stress points on the cable that can result in water reaching the core, leading to erratic heating and eventual cable failure.

#### Other Leading Brands of Self-regulating Cable

The outer jacket of most self-regulating heat cable separates from the core at a typical bend radius of 2 inches.

#### ProLine Self-regulating Heat Cable

ProLine self-regulating heat cable features a higher quality outer jacket that does not “bubble”. This reduces the chances of water seepage and cable failure.

#### ProLine Radiant Self-regulating Heat Cable

ProLine self-regulating heat cable does not “bubble” at an even tighter bend radius of 1½ inches.

### Installation at Low Temperatures

#### Typical Self-regulating Heat Cable

Typical self-regulating cable has a minimum installation temperature of 32-40°F. This is because the carbon in the cable becomes brittle and can easily break when bent or manipulated at low temperatures.

The outer jacket also becomes stiff, making the securing of cable to the pipes difficult during cold weather installations. The outer jacket tends to “pucker” and pull away from the core when making bends, compromising the cable’s integrity and leading to cable failure.

Therefore installing most self-regulating heat cable at temperatures below 40°F is not recommended.

*ProLine self-regulating heat cable and plug with GFCI.*

#### ProLine Self-regulating Heat Cable

ProLine self-regulating cable features a higher quality carbon center that is more resilient in low temperatures, thereby allowing the cable to be safely installed at temperatures as low as 0°F.

The higher quality outer jacket also remains flexible at low temperatures, resulting in more reliable performance and easier installation when securing to various pipe trace applications.

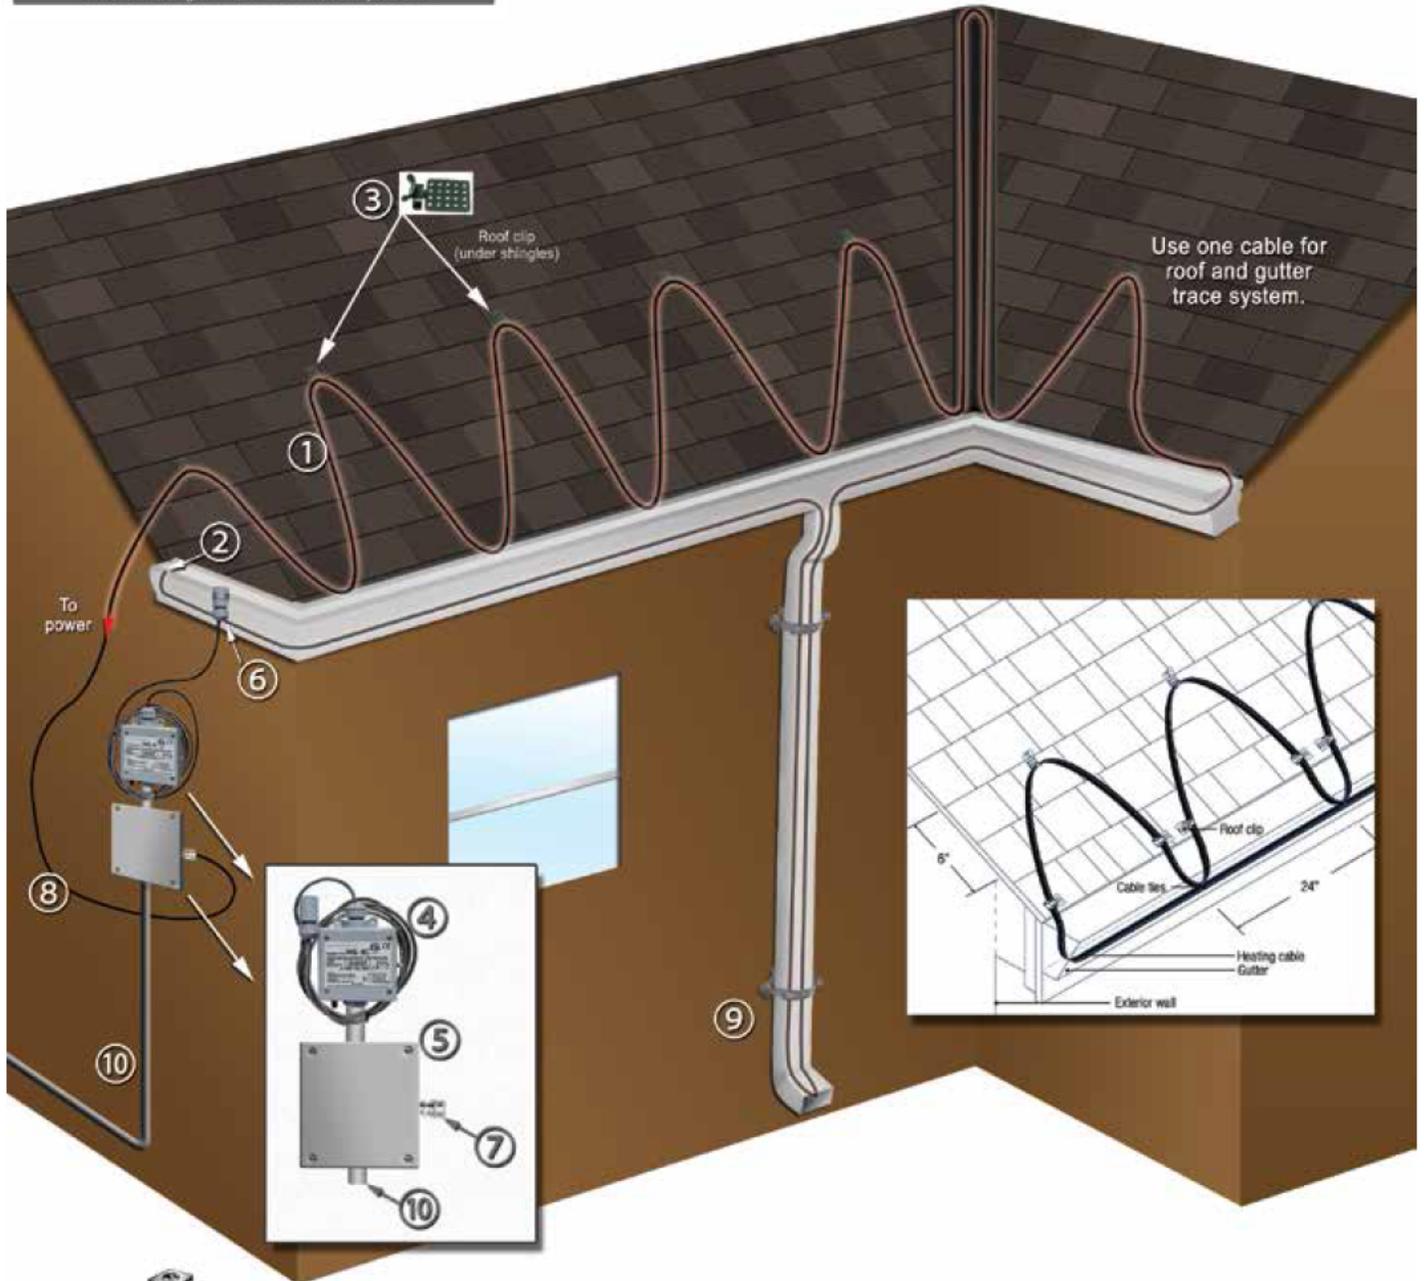

*“In all the years I’ve been installing radiant heating systems, I’ve noticed that “bubbles” in the outer jacket of the cable almost always result in a point of failure. The superior outer jacket of ProLine’s self-reg cable helps to eliminate this problem.”*

– Eric W., Licensed Contractor

# Self-Regulating Heat Cable System Overview

Several roof heating options are available from ProLine Radiant. The illustration below shows the general layout of a self-regulating heat cable system, heating the roof edges, valley, gutter and downspout. For specific installation information please refer to the installation manual.

Self-reg Cable

- ① Self-regulating heat cable
- ② End seal (termination) kit
- ③ Roof cable clips (under shingles)
- ④ Snow sensor or thermostat (WS-8C sensor with inline sensor shown)
- ⑤ Mulberry or Bell weatherproof junction box
- ⑥ Remote sensor (secured with Minerallac clamp)
- ⑦ Power connection kit
- ⑧ Drip loop (prevents water from trailing into the junction box)
- ⑨ Double or single downspout hanger
- ⑩ Conduit to home

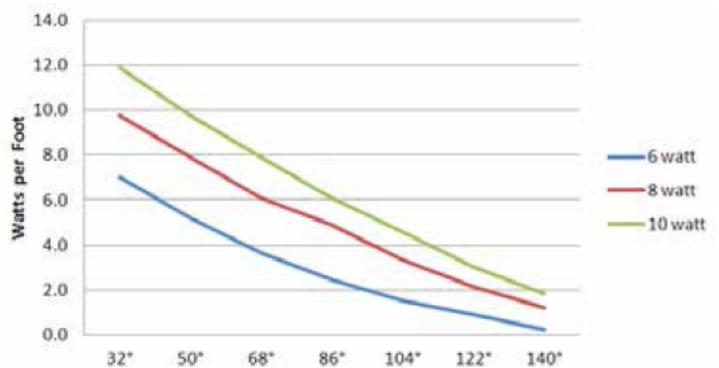

# PLSRL Heat Trace Cable Data Sheet

PLSRL self-regulating heat cable is the cable of choice for roof heating and gutter trace applications. The cable features a flexible outer jacket and durable carbon core, providing consistent performance, long lifespan, and easy installation in cold temperatures.

Technical Data for PLSRL Heat Cable	
Service voltage	110-120 V, 220-277 V
Maximum maintain or continuous exposure temperature (power on)	+149°F (65°C)
Maximum intermittent exposure temperature 1000 hours (power on/off)	+185°F (85°C)
Minimum installation temperature	-40°F (-40°C)
Protective braid resistance	<.006Ω/ft.
Bus wire gauge	16 AWG
Approvals	cUL; ATEX, IECEx
Warranty	2 years

Watts per foot Power Output Curves

# PLSRR Heat Trace Cable Data Sheet

PLSRR is listed self-regulating heat cable that can be used for roof / gutter heating and pipe tracing applications. The cable features a flexible, UV-stabilized thermoplastic elastomer overjacket that protects the carbon core for wet applications and exposure to the sun. The parallel heating cable is designed for a variety of industrial applications and environments, including explosion-hazardous and nonhazardous areas, and can be used for plastic or metal pipe freeze protection and temperature maintenance of tanks, pipes and valves. The cable includes a NON-PRORATED 10-year warranty.

Technical Data for PLSRR Heat Cable	
Service voltage	110-120 V, 220-277 V
Maximum maintain or continuous exposure temperature (power on)	+149°F (65°C)
Maximum intermittent exposure temperature 1000 hours (power on/off)	+185°F (85°C)
Minimum installation temperature	-40°F (-40°C)
Protective braid resistance	<.006Ω/ft.
Bus wire gauge	16 AWG
Approvals	cULus; hazardous, CSA, ATEX, IECEx
Warranty	10 years (Not prorated)

# PLSRM Heat Trace Cable Data Sheet

PLSRM self-regulating heat cable is designed for pipe trace applications. The cable provides safe, reliable heat tracing for freeze protection or temperature maintenance of pipes, valves, and flanges, etc. PLSRM heat cable is suitable for use on small diameter plastic or metal pipes and instrument tubing in residential and light commercial applications. The heat cable features a flexible outer jacket and durable carbon core, providing consistent performance, long lifespan, and easy installation in cold temperatures.

Technical Data for PLSRM Heat Cable	
Service voltage	110-120 V, 220-277 V
Maximum maintain or continuous exposure temperature (power on)	+149°F (65°C)

# Pre-Assembled Heat Trace Cable

ProLine pre-assembled (pre-terminated) self-regulating heat cable is the premier solution for quick, easy installation for roof and gutter heating and pipe trace applications. The 120 volt pre-assembled plug-and-play kits come with the option of a standard power cord with or without a GFCI power plug. The termination, power connection, splice, tee, and end seal kit reduces installation time and requires no special skills or tools.

## PLSRT-1 120 V Pre-Assembled Heat Cable

ProLine PLSRT-120 pre-assembled self-regulating heating cable is designed for commercial metal and plastic pipe protection and roof and gutter deicing applications. The 120-volt heating cables are available in 6, 12, 18, 24, 50, 75, 100, 125 and 150-foot lengths, and each comes assembled with a 6-foot power cord and plug.

PLSRT-1 heating cables may be used on:

- Roofs made from all types of standard roofing materials, including shake, shingle, rubber, tar, wood, metal, and plastic.
- Gutters made from standard materials, including metal and plastic.
- Downspouts made from standard materials, including metal and plastic.

ProLine 120 V pre-terminated self-regulating heat cable.

Self-reg Cable

## PLSRT-1 General Specifications (110-120 V)

Nominal cable width	½-inch (12.7 mm)
Nominal cable thickness	.24-inch (6.1 mm)
Bus wire gauge	16 AWG
Circuit breaker size	15 amps
Plug rating	15 amps
Maximum exposure temperature	150°F (65°C)
Minimum installation temperature	-40°F (-40°C)
Voltage rating	110-120 V
Protective braid resistance	< 18.2Ω/km
Cold lead length	6 feet with plug
Electrical classification	Non-hazardous; ordinary areas
Exposure to chemicals	None

## PLSRT-2 General Specifications (208-277 V)

Nominal cable width	½-inch (12.7 mm)
Nominal cable thickness	.24-inch (6.1 mm)
Bus wire gauge	18 AWG
Circuit breaker size	15 amps
Cold lead length	6 feet
Maximum exposure temperature	150°F (65°C)
Minimum installation temperature	-40°F (-40°C)
Voltage rating	208-277 V
Electrical classification	Non-hazardous; ordinary areas
Exposure to chemicals	None

## PLSRT-2 240 V Pre-Assembled Heat Cable

PLSRT-2 240-volt pre-assembled electric heating cable is intended for installation on metal or plastic water pipes for freeze protection in commercial locations. PLSRT-2 heating cable is available in 6, 12, 18, 24, 50, 75, 100, 125, 150, 175 and 200-foot lengths with a 6-foot power cord.

### General Instructions

Install only in accessible locations; do not install behind walls or where the cable would be hidden.

Do not run the heating cable through walls, ceilings, or floors.

Connect only to ground-fault protected outlets that have been installed in accordance with all prevailing national and local codes and standards and are protected from rain and other water.

### General Usage Guidelines

- ProLine Radiant pre-terminated heating cables are not intended for use on flexible vinyl tubing (such as garden hoses).
- The heating cables should not be used inside any pipes.
- PLSRT pre-assembled heat cable is not intended for freeze protection of liquids other than water or for use in locations classified as 'hazardous'.
- Use a minimum of ½-inch fire-resistant, waterproof thermal insulation when installing the PLSRT heat cable on pipes.
- Never use the heat cable on pipes that may exceed 150°F (65°C).
- Do not use an extension cord with the heat cable.

# Constant Wattage Heat Trace Cable

## PLCW Roof, Gutter and Pipe Heating

The PLCW constant wattage heat trace cable is pre-assembled and ready to install. The cable can be used to prevent pipes from freezing and keep water flowing on roofs and gutters in temperatures as cold as -40°F (-40°C).

Using an energy saving thermostat, PLCW cables operate on 120/240 volts AC and are suitable for use on plastic and metal water pipes.

This quality system features components that are made of the highest quality material and tested during critical points in the manufacturing process.

The PLCW Series system is easy to buy and install in various cable length increments to accommodate many pipe lengths with diameters up to 1.5 inches.

## Features

- Each cable consists of tough XLPE inner insulation, AL foil, a continuous ground braid, and a weather resistant PVC (high-low temperature) outer jacket.
- Includes advanced, energy saving thermostat.
- Comes pre-assembled, facilitating quick, easy installation.
- Can keep water flowing in temperatures as cold as -40°F (-40°C).
- Indicator light in plug (PLCW-7-1)
- 3-year limited warranty

The PLCW Series system is easy to install for a variety of pipe lengths with diameters up to 1.5 inches.

## Pipe Trace Controls

ProLine offers state-of-the-art, custom engineered control panels designed for your specific requirements. ProLine controllers continuously monitor your heat tracing system and provide you with user-settable alarms for temperature, heater current and ground fault current (all independent of the trip levels) to maintain your heat trace system and warn you of potential problems. This advanced heat trace system offers local, group and central computer interfaces.

### Features and Benefits Include:

**Alarm Outputs and Early Warning Alarm** - Alarm alerts users to problems, even when the circuit is not in use.

**Modbus® Protocol** - Allows easy interfacing with the master controller software and links to PLC and DCS systems.

**Statistics Monitoring** - Plant-wide Windows-based monitoring software allows users to save energy by monitoring peak demand times. Provides energy monitoring tools through the measured values of heater utilization, power consumption (MWh), and operating costs.

**Staggerstart (Power Limiting)** - Limits initial startup power.

**Proportional Control** - Provides tight process temperature control.

**Custom Configured Software Interface** - Local, remote, or centralized control and monitoring are available, as well as standalone control and multi-point control panels.

**Switching Unit Options** - Solid state or mechanical.

**Easy to read Display** - 2x16-character alphanumeric display (field mounted or remote mounted).

**Friendly Interface and Easy to read Display** - Local and Remote interface choices are available. The Local Interface communicates with a single controller of up to 10 circuits and up to five feet away. The Remote Interface communicates with multiple controllers (up to 30 controllers or 300 circuits), to a maximum of 4,000 feet without repeaters.

### RS 485 Serial Port Connections

**Load Shedding** - A master override input allows for external control for load-shedding or ambient control.

### Advanced Control

The advanced features of this controller allow it to handle single-phase to three-phase heat trace applications with switch ratings up to 100A at 600 VAC. Integral user-settable ground fault trip protects the heat trace without costly ground fault breakers. The user-settable ground fault test function lets you know if ground fault monitoring is functioning properly. The RTD

inputs (dual RTD inputs available) have a user-settable fail-safe strategy.

### Master Controller Centralized Monitoring

For plant-wide monitoring, the master controller for windows software package provides programming and monitoring for ProLine heat tracing controllers on your PC. Process setpoints and alarm levels are programmed for each heater through the computer keyboard, reducing data entry on large systems. Setpoint programming and configuration functions are password protected. By connecting individual modules or panels together, heat tracing throughout an entire plant can be programmed and monitored from a single location.

# Roof and Gutter Trace Controls

## Self-regulating Heat Trace Cable

ProLine Radiant roof deicing systems are custom designed to best serve the needs of each specific installation. In addition to the custom heating cable layout, users also have activation device/controller options for operating the system.

**WS-8C Aerial Mount Sensor** - The WS-8C activation device is designed for gutter, downspout, and roof ice melting and small satellite antenna deicing. The totally sealed, low voltage, remote-mount precipitation sensor allows the user to install the small sensor head in a downspout, the back of a gutter, or at the end of an antenna boom, up to 10 feet away from the unit so that the main controller can be installed in a more convenient outdoor location.

The unit is housed in a two gang PVC enclosure. The overall dimensions of the WS-8C are 4¾" (120 mm) x 7" (178 mm) x 2¾" (70 mm). The unit weighs 2 pounds. The user may access all electronics by removing the four front cover screws.

**WS-115 Outdoor Ambient Sensing Thermostat** - The WS-115 ambient sensing thermostat is designed to sample temperature changes in the air. The WS-115 can be used in a wide range of heating applications and can serve as a high limit backup for "sensitive" applications. The NEMA 4X rain-tight enclosure provides adequate protection in most environments. The WS-115 thermostat has a temperature range of 40°F to 110°F and can handle up to 22 amps at 277 VAC.

### WS-115 Features

- Rugged weather resistant enclosure made of corrosion resistant materials for long life.
- Stainless steel remote bulb provides rapid response to temperature change.
- Low mass, high surface area of stainless steel coiled sensor provides rapid response to temperature change.
- Large, readily visible dial with 0°F - 120°F temperature range and 40°F - 110°F.
- Multi-positional mounting offers flexibility in either new or existing installations.
- One control for both heating and cooling applications.

**WS-115R Outdoor Surface Sensing Thermostat** - The WS-115R surface sensing thermostat samples temperature changes in the surface. The sensor is typically used as a line sensing control for pipes, vessels and other types of electric heat tracing applications. Suitable for use in agricultural, industrial and commercial environments. The NEMA 4X rain-tight enclosure provides adequate protection in most environments.

### WS-115R Features

- Rugged weather resistant enclosure made of corrosion resistant materials for long life.
- Stainless steel remote bulb provides rapid response to temperature change.
- Low mass, high surface area of stainless steel coiled sensor provides rapid response to temperature change.
- Large, readily visible dial with 0°F - 120°F temperature range.
- Multi-positional mounting offers flexibility in either new or existing installations.
- One control for both heating and cooling applications.
- Complies with NEC 547 and NEMA 4X requirements.

## Cable Accessories and Connections

### PLSR14 - Roof clips

- A Roof clips - 50 per bag

### PLSR14IR - Roof clips

- A Insulated roof clips - 50 per bag

### PLSR15 - Downspout hanger kit

- A Hanger bracket
- B Clamp ties

### PLSR10 - Splice / tee kit

- A Clamp tie
- B Mastic strips (1½" long x 1" wide)
- C Heat-shrinkable tube (8" long x 1" diameter)
- D Heat-shrinkable tube (1" long x ⅜" diameter)
- E Heat-shrinkable tube (1" long x ½" diameter)
- F Uninsulated braid crimp
- G Cable ties
- H Insulated bus wire crimps
- I Black cloth tape (6" long)
- J Heat-shrinkable cap
- K Heat-shrinkable tube for ground

### PLSR00 - Power connection kit - with end seal kit (PLSR12)

- A Black-shrinkable tube (2) (5½" long x ⅜" diameter)
- B Green-shrinkable tube (6" long x ¼" diameter)
- C Black heat-shrinkable tube (1" long x ½" diameter)
- D Seal fitting and black grommet
- E Mounting bracket for piping
- F Gasket
- G Lock nut
- H Grommet
- I Wire nuts (3)
- J Labels (4)

### PLSR Cable Accessories and Controls

Item Number	Description
PLSR00-Roof	Power connection kit
PLSR03-Aluminum	Aluminum application tape
PLSR03-Fiberglass	Fiberglass application tape
PLSR08	Plug-in cord set, 120 V GFCI, 125 ft. maximum run length
PLSR10	Splice / tee kit
PLSR12	End seal kit
PLSR12L	End seal with light (can be used at beginning or end)
PLSR14	Roof clips - 50/bag
PLSR-14IR	Insulated roof clips - 50/bag
PLSR15	Downspout hanger kit
WS-115	Air sensing NEMA 4X outdoor thermostat 120/240 V
WS-115R	Surface sensing NEMA 4X outdoor thermostat
WS-8C	Aerial mounted snow switch with remote moisture sensor (30 amps; 120-277 V)

*ProLine Radiant roof deicing and gutter trace systems can eliminate the build up of snow and ice, and protect homes from water damage due to ice dams. Gutters and downspouts are also protected from the damaging effects of heavy ice.*

# ProLine

RADIANT HEAT SOLUTIONS

## Low-Voltage Roof Deicing Systems

## ProLine's Industry Leading Roof Deicing System

ProLine's innovative low-voltage roof deicing systems feature a unique, self-regulating, semi-conductive polymer heating element that is very thin and can be cut on site and discreetly nailed or stapled under shingles for quick, easy installation. The heating element is polypropylene fused during fabrication to achieve water proofing.

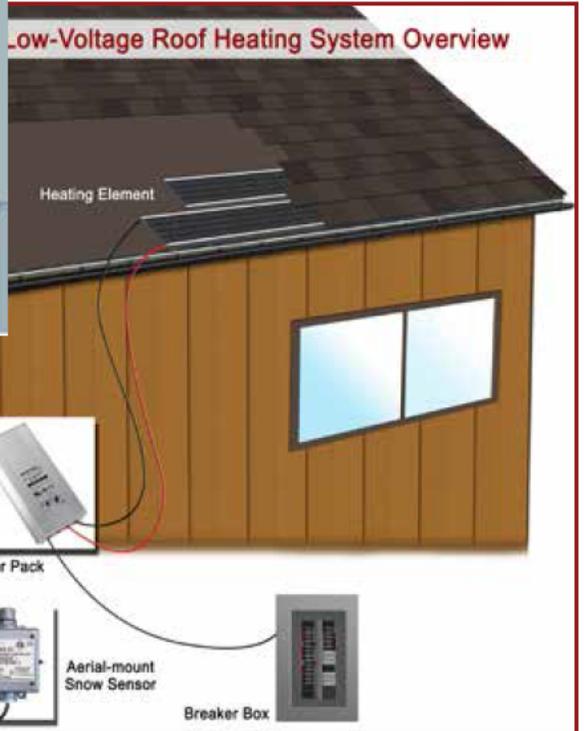

*ProLine low-voltage roof heating element installed in roof valley.*

The thin polymer heating element comes in widths of 3, 9 and 12-inches and can be nailed or attached with fasteners or screws under a variety of roofing materials, including shingles and metal.

The fully automated maintenance-free roof deicing system is one of the most advanced and efficient roof deicing systems available. The PTC nano-technology allows the elements to heat with maximum power in cold environments and use less electricity as they warm up. This minimizes power consumption and can reduce operating costs by 30 to 60 percent compared to traditional cable systems.

*Overview of ProLine low-voltage roof heating system (with element being installed under the shingles at the building's edge).*

Roof Deicing

# Low-voltage Roof Deicing System

## Automated Roof Deicing System

### How it Works

ProLine's roof deicing systems involve three main components: the polymer heating element, a step-down transformer, and an activation device (i.e., an aerial-mount snow switch and/or temperature sensor) that automatically triggers the system when weather conditions warrant.

The transformer is responsible for a specific section of the deicing system, and can step down from high voltage to low voltage (60 V or less). It is the source for monitoring the power and output to the system's heating element to ensure safe, accurate performance of the roof deicing system.

The activation device/snow sensor (typically mounted at the roof's edge) signals the control panel when weather conditions warrant. The sensor detects moisture and temperature, so when snow begins to fall and the temperature is below the set point (usually 39°F), the sensor signals the controller, which then sends power to the heating element to warm the roof.

### Features and Benefits

- **Extremely Thin Profile** - The flexible heating element is just 3/64-inch, allowing for simple, discreet installation under roofing.
- **Self Regulating** - When the ambient temperature rises, the electrical resistance increases and the consumption of electricity decreases, preventing the element from overheating and ensuring energy-efficient operation.
- **Maintenance Free** - The system has no moving parts and is maintenance free.
- **Easy Installation** - Roll out the flexible heating element and cut to size while on the job site for a perfect fit.  
Unlike many other roof heating systems, the low-voltage polymer heating element can be nailed or stapled through, simplifying the installation process.
- **Versatile** - ProLine Radiant's low-voltage system can be safely installed under most roofing materials, including metal.
- **Power Options** - The system operates on 24 volts (AC/DC) and can also be connected to a wind or solar power supply.
- **Protective Polypropylene Fabrication** - The product is polypropylene fused during fabrication to achieve water proofing.
- **Energy Efficient** - The roof heating system requires minimal power consumption. For even greater energy savings when heating metal roofs, use a heat retention mat.

*Mountain cabin with low-voltage roof deicing system installed at the roof edges.*

# Low-voltage Roof Deicing System Specs

## Heating Element Technical Data

Heating technology	Positive temperature coefficient (PTC) semi-conductive polymer
Width	12 inches (305 mm); Also available in widths of 3, 9 inches.
Thickness	3/64 inch (1.2 mm)
Length	Cut to order (maximum per strip: 32 feet (9.75 meters))
Secondary draw per foot	24 volts @ 68°F (20°C): 45 amps 24 volts @ 32°F (0°C): 54 amps
Warranty	10 years
Approvals	ETL listed; hazardous
Certifications	Class I, Div.2 Groups A,B,C,D Class II, Div.2 Groups F,G Class III

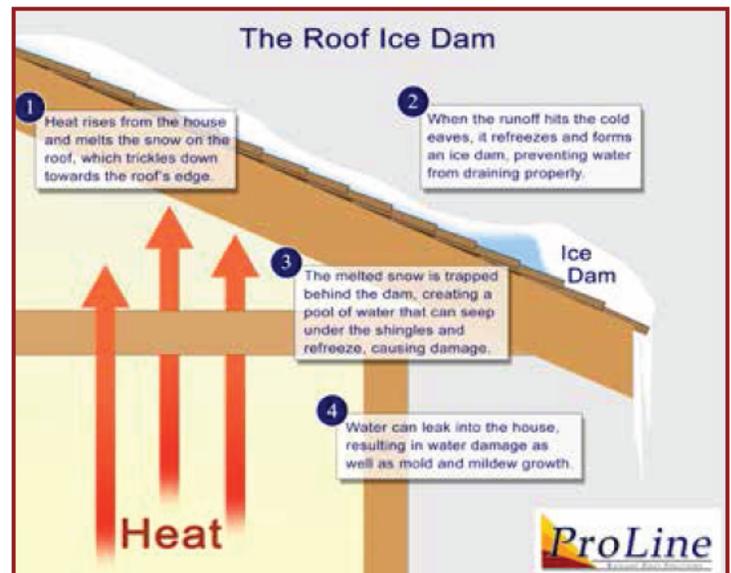

Illustration: How ice dams form on roof edges.

## Power Supply Technical Data

Low-voltage dry type isolation power supply
Extruded aluminum profile enclosure with heat sink
120, 208, 240 VAC primary and 24 VAC secondary
Primary and secondary circuit protection
RoHS compliant interface board
2-year warranty

Heating element being installed under shingles.

CON-DB	Connector DB TCU. (Priced per piece.)
TAPE-R	Sealant tape - roll
TCU14-Black/White	Tinned copper wire, 14 AWG. (Priced per foot.)
TCU12-Black/White	Tinned copper wire, 12 AWG. (Priced per foot.)
TCU10-Black/White	Tinned copper wire, 10 AWG. (Priced per foot.)
PL-3-Conductor	Signal wire from power supply. (Priced per foot.)
PL-TOOL	Crimp tool
PL-TAPE-10	Roll of double coated tape - 3 inches x 30 feet
PL-TAPE-5	Roll of double coated tape - 3 inches x 15 feet
PL-HRP	Polyurethane padding. (Priced per square foot.)

# ProLine

RADIANT HEAT SOLUTIONS  
Radiant Floor Heating Systems

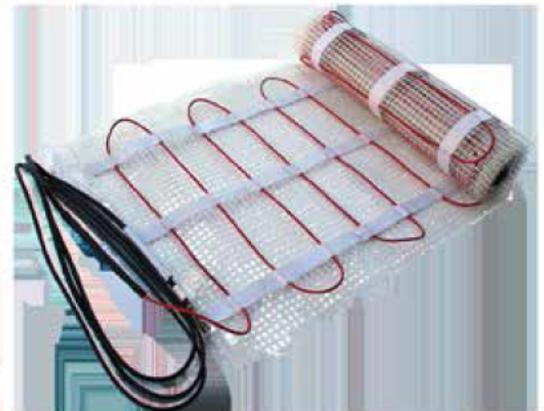

ProLine Radiant's electric floor heating system is one of the most popular and durable floor heating solutions on the market. Available pre-spaced in mats with an adhesive backing, or on spools, the versatile heat cable is effective for virtually all types of floor surfaces, including tile, marble, slate, laminates, and hardwood.

## Features Include:

- Single-point connection
- Twin-conductor cable
- Safety approved for wet locations
- Flexible installation (easy to customize)
- Durable construction
- 25-year warranty

## ProLine Radiant Floor Heating Mat

The ProLine floor warming system includes a heating cable that is pre-spaced on an adhesive backed fiberglass mesh that allows for quick, simple roll out installation.

## ProLine Radiant Floor Heating Cable

Available off the spool, the ProLine floor warming cable includes heat cable with a 10-foot cold lead.

## Floor Heating Cable Specifications

Cable construction	Twin conductor
Rated voltage	120 V, 240 V
Output (cables)	12W/ft. <sup>2</sup> (130W/m <sup>2</sup> )±10% (at recommended spacing)
Output (mats)	12W/ft. <sup>2</sup> (130W/m <sup>2</sup> )±10%
Recommended spacing	3-inches (76.2 mm)
Bending radius	1-inch (25.4 mm)
Cable diameter	1/8 to 1/6-inch (3.2 mm-4.2 mm)
Conductor insulation	Fluoropolymer
Outer insulation	High temperature PVC
Max. ambient temperature	104°F (40°C)
Min. installation temperature	40°F (5°C)
Cold lead	2-wire 16 AWG plus ground braid; 10 feet (3 m) length

All of the ProLine floor heating systems offer you a choice of technologically advanced thermostats.

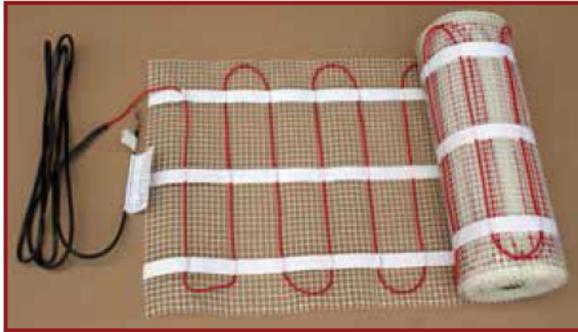

# PROLINE FLOOR HEATING ORDERING INFORMATION

The most commonly ordered floor heating cable sizes are listed below.

To order additional sizes and voltages, please contact a ProLine representative at 866.676.9276.

## ProLine Heat Cable in Mats

## ProLine Heat Cable on Spools

### 120 Volt Mat

Item Number	Heated Area (Sq. ft.)	Mat Dimensions (Feet)	Watts (12 W/Sq. ft.)	Amps	Ohms
TM1010	10	1.5 x 6.7	120	1.0	120.0
TM1020	20	1.5 x 13.3	240	2.0	60.0
TM1030	30	1.5 x 20.0	360	3.0	40.0
TM1040	40	1.5 x 26.7	480	4.0	30.0
TM1050	50	1.5 x 33.3	600	5.0	24.0
TM1060	60	1.5 x 40.0	720	6.0	20.0
TM1070	70	1.5 x 46.7	840	7.0	17.1
TM1080	80	1.5 x 53.3	960	8.0	15.0

### 120 Volt Cable

Item Number	Length (Feet)	Approximate Heat Coverage (Square feet)			Watts	Amps	Ohms
		2-inch spacing	Standard 3-inch spacing	4-inch spacing			
TC10120	38.9	6	10	13	120	1.0	120
TC10240	77.8	13	19	26	240	2.0	60.0
TC10360	116.7	19	29	39	360	3.0	40.0
TC10480	155.6	26	40	52	480	4.0	30.0
TC10600	194.5	32	49	65	600	5.0	24.0
TC10840	272.4	45	68	91	840	7.0	17.1
TC10960	311.3	52	78	104	960	8.0	15.0

**WARRANTY INFORMATION:** ProLine Floor Heat Cable: 25-year limited warranty.

# FoilHeat

## ProLine Radiant FoilHeat Floor Warming System

ProLine Radiant's FoilHeat cut-and-turn floor heating mat is a unique electric radiant floor heating system that is designed for use under carpet, laminate, engineered wood and other floating floors. The FoilHeat mats can be cut and shaped on site to meet the specific requirements of the project (see illustration on page 43). The efficient floor heating system is ideal for heating any size or shape room, from basements and bedrooms to commercial offices, and more.

### Heated Carpet and Laminate Flooring

FoilHeat is an ultra thin electric radiant floor heating system primarily for use under carpet, laminate, engineered wood and other floating floors. The principle advantages of using FoilHeat include ease of installation, rapid response time, and uniform heating of floor surfaces. The special design and aluminum construction help to eliminate 'hot-spots' or localized heating.

### Specifications

Power	Available in 120 V and 240 V
Output rating	12 W/ft. <sup>2</sup>
Thickness	3/8 inch (3 mm)
Cable spacing	2 inches (50 mm)
Cold lead	10 feet (3.0 meters)
Connections	2 conductor with ground
Inner insulation	Advanced fluoropolymers

### Features and Benefits

- Simple "roll out" installation
- Installs between the insulation pad and the floor
- There is virtually no floor buildup because of the grounded, flat aluminum
- No thin-set is required
- The aluminum construction efficiently distributes heat quickly and evenly
- System is completely grounded and safe
- Watertight (Heated carpet floors can be steam cleaned.)
- UL approved
- 12 watts per square foot (41 BTUs per square foot)
- 5-year manufacturer warranty
- NOTE: Any overlay must not exceed an R-value of 1.0

**Right:** ProLine's FoilHeat electric radiant floor warming system shown being installed to heat basement floor.

Some advantages of using FoilHeat include the ease of installation and uniform floor heating. The special materials used help to eliminate problems of 'hot-spots' or localized heating.

# FoilHeat

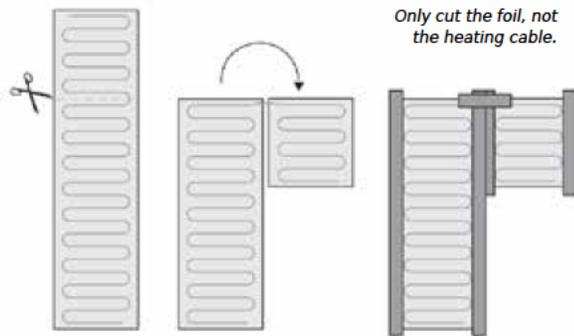

## FoilHeat Heating Element Construction

The heating element of the FoilHeat system is made with fluoropolymer insulated heating cables that are sandwiched between two layers of specially reinforced aluminum foil. The uniform spacing of the heating elements, further backed by the aluminum foil, ensures even heat distribution. The heating element is connected to a power-supply cable, which exits the laminate mat from one corner.

The power lead is a thin flat two-core flexible cord, consisting of two insulated conductors with a metal sheath and an outer sheath. Depending on your heating requirement, FoilHeat is available in 120 and 240 volts at 12 watts per square foot. It is available in predetermined lengths with cold tail – prefabricated and tested in a carefully controlled factory environment.

**NOTE: Only cut the foil. DO NOT cut the actual heating cable.**

*FoilHeat mats can be easily cut on site.*

*When cutting the mat to make turns (see illustration to the left), be sure to cut the mat only. DO NOT cut or damage the heat cable.*

## PROLINE FOILHEAT ORDERING INFORMATION

All FoilHeat Mats are 20-inches wide

### 120 V FoilHeat Mats Sizing Guide (12 watts per square foot)

Heated Area (Sq. ft.)	Part Number	Length	Width	Wattage (W)	Amps (A)
10	LM1010	6 feet	20 inches	120	1.0
25	LM1025	15 feet	20 inches	300	2.5
50	LM1050	30 feet	20 inches	600	5.0
70	LM1070	42 feet	20 inches	840	7.0

### 240 V FoilHeat Mats Sizing Guide (12 watts per square foot)

Heated Area (Sq. ft.)	Part Number	Length	Width	Wattage (W)	Amps (A)
25	LM2025	15 feet	20 inches	300	1.25
50	LM2050	30 feet	20 inches	600	2.50
95	LM2095	57 feet	20 inches	1140	4.75
140	LM2140	84 feet	20 inches	1680	7.00

\* Other sizes are available. For details, please contact ProLine.

Floor Heating

# ProLine SLAB/STORAGE

## Floor Heating Systems

## Floor Heating Cable for Concrete Slabs

Slab/Storage floor heating cable is designed for installation in new concrete slab applications. The heat cable is tied directly to the rebar and embedded at least ½-inch below the surface. The thermal heating cable efficiently uses the concrete slab to store and distribute heat evenly throughout its intended area. The ProLine heat cable is affordable and can be installed commercially or in residences to provide radiant heating for virtually any type of flooring, including decorative concrete, hardwood, carpet, laminate and ceramic tile, resulting in luxurious warmth for any home or business.

### Floor Heating Applications

Designed to produce 10-15 watts per square foot, ProLine Slab/Storage heat cable is the premier floor heating solution for in-slab applications and decorative concrete of both custom residential and large commercial projects. The radiant floor heating system can efficiently provide comfortable heat for virtually any type of radiant floor heating application, ranging from decorative concrete to hardwood, carpet, laminates, and ceramic tile.

The Slab/Storage radiant floor heating system offers maintenance-free operation, is easy to install and features a comprehensive 10-year manufacturer warranty. Because the Slab/Storage heat cable is waterproof, it is safe for use in both wet and dry applications, including tiled shower and bathroom floors.

### Decorative Concrete

Slab/Storage heat cable has proven to be perfectly suited for heating decorative concrete floors. Designed to withstand the stress of heavy concrete pours, ProLine Slab/Storage heat cable safely heats decorative and stained concrete floors without affecting the luster of colors over time. The reliability of the slab heating system has made it a favorite among professionals specializing in concrete floor installations. Slab/Storage Heat features rapid response times and utilizes the concrete slab to store and distribute heat, maximizing the efficiency of the system.

### Versatile and Easy to Install

The Slab/Storage floor heating system is easy to customize and install in any size or shape of room. While it can be installed under any type of floor, the cable is required to be embedded in at least ½-inch of concrete or mortar.

### Features and Benefits

- Single-point connection simplifies installation
- Safe for use in wet and dry applications
- For commercial and residential
- Save money by heating during “off-peak” hours
- Durable construction
- Flexible and easy to install
- Can be installed in concrete slab under virtually all floor types. (Ideal for heating decorative concrete.)
- 10-year manufacturer warranty

*Slab/Storage heating cable is durable, versatile, and easy to install. ProLine Slab/Storage heat's proven track record is one reason why it's a favorite among professional builders.*

# Interior Radiant Heat Controls

The ProLine Radiant electronic thermostats are specifically designed to control electric radiant floor heating systems for maximum comfort and minimum power consumption. Developed for the modern home, the programmable thermostat features a large back-lit display and simple user interface. The system temperature is controlled by an external or built-in floor sensor.

Each thermostat includes an integrated Ground Fault Circuit Interrupter (GFCI, Class A). The thermostat is an electronic on/off thermostat for controlling the temperature using a sensor placed externally. The heat output is switched on and off with a difference of only 0.7°F (0.4°C).

### Adjustable Temperature Offset

The setpoint can be adjusted to match the actual floor temperature. This ensures a 100 percent accurate measurement and control of your underfloor heating system.

The thermostat can be configured for control of the floor temperature and regulator without a sensor. The advanced thermostat is compatible with existing floor sensors by means of a temperature setting, making it the best thermostat for renovation purposes.

### Temperature Scale and Limitation

The floor temperature scale can be adjusted within the temperature range of +41°+104°F. The thermostat also features a maximum temperature function to protect wood floors and minimum temperature functions for comfort. Designed for ease of use and superior performance, the thermostat and GFCI are dual voltage models suitable for 120/240V, 50/60 Hz power supplies.

### General Thermostat Specifications

Functions	On/Off control, easy-to-read digital display, 7-day programmable
Supply voltage	120/240 V ±15%, 50/60 Hz
Load	15A maximum (resistive load)
Power	1.800 W at 120 VAC / 3.600 W at 240 VAC
Temperature control range	40 to 104°F (5 to 40°C)
Ambient temperature range	32 to 104°F (0 to 40°C)
Floor temperature sensor	2-wire, 10-foot lead wire
Floor sensor type	NTC (12 KΩ) 10 ft. (3 meters)
GFCI	Class A (5 mA trip level)
On/Off differential	0.7°F (0.4°C)
Regulation principle	PWM / PI
Housing	NEMA 2 (IP21)
Dimensions (H/W/D)	4.8, 3.0, 1.0 inch (123, 75, 25 mm)

## FLOOR HEATING CONTROLS AND ACCESSORIES ORDERING INFORMATION

### Floor Heating Thermostats

Item Code	Description
PL-dual-99	Programmable thermostat with air sensor (and floor temperature limiter)
PL-dual-99T	Programmable touch screen thermostat
PL-dual-99TW	Wi-Fi enabled touch screen thermostat
PL-4991	Non-programmable thermostat with floor sensor
PL-4000	Power module with GFCI

### Floor Heating Accessories

Item Code	Description
PL-RKTC	Repair kit floor (includes crimp connectors, repair wire, heat shrink tubes)
PL-RKFH	Repair kit foil (includes crimp connectors, repair wire, heat shrink tubes)
PL-Buzzer	Little Buzzer - continuity alarm
PL-Strap	Cable strapping, 25 feet (7.6 m)
PL-Sensor	Replacement floor sensor for thermostat

# ProLine Floor Heating Thermostats

## Touch Screen Programmable Thermostat

The touch thermostat for electric floor heating features a sleek design and intuitive control for easy installation. This advanced programmable thermostat\* delivers optimal comfort and minimum energy consumption. Includes floor sensor with 10-foot (3-meter) cable.

- Universal compatibility with existing floor heating sensors
- New 'Easy Scheduling' method and simple on-the-fly changes
- 3.5-inch color screen with easy interactive touch control
- Track power consumption and easily save to a PC
- Thermostat settings can be exported to web page for support
- Suitable for tile, stone, laminate, concrete and wooden floors
- Power Supply: 120-240 VAC 50/60 Hz; 15A maximum resistive load
- Class A (5mA trip level) GFCI
- \* Wi-Fi enabled model available

## PRO Dual Sensing Programmable Thermostat

The programmable thermostat with dual sensors is an "all-in-one" programmable thermostat for electric underfloor heating control where optimal comfort temperature and minimum energy consumption is required.

- Simple user interface and thoughtful installation design
- Includes two sensors: a built-in air sensor (to measure room temperature) and a floor sensor with 10-foot (3-meter) cable to measure actual floor temperature.
- Pre-programmed for quick setup
- Monitored energy consumption
- Simple operation (Easy to use)
- Multi voltage: 120-240 VAC (includes 208 VAC)
- Output relay: 15A
- Large back-lit display for easy reading
- Serves as single thermostat for all applications (room, floor, room with floor limitation and as regulator)
- Class A GFCI: suitable for wet room installation

## PRO Power Module Slave Relay

For large floor heating applications, the Power Module Slave Relay can be extended with additional Power Relay Modules. The PRO Slave Relay module features a built-in Class A GFCI and increases output by 15 amps per module. Output can thus be increased by 15A per module.

- Easy to use
- Screw terminals for safe and easy installation
- For use only with the CT Programmable Thermostat
- Multi voltage: 120-240 VAC (includes 208 VAC)
- Output relay: 15A
- Class A GFCI: suitable for wet room installation

## PRO Digital/Non-programmable Thermostat with Floor Sensor

Optimal comfort in controlling electrical underfloor heating. Built on efficiency, intuitive operation and with a stylish design. Includes floor sensor with 10-foot (3-meter) cable.

- Simple user interface and thoughtful installation design / Easy to use
- Screw terminals for safe and easy installation
- Multi voltage: 120-240 VAC (includes 208 VAC)
- Output relay: 15A
- Large back-lit display for easy reading
- Class A GFCI: suitable for wet room installation

## Hydronic Radiant Heat - ProLine Products and Services

ProLine Radiant is a nationally recognized authority in the design and installation of hydronic radiant heating and solar hot-water systems. The products and services that ProLine offers are based on extensive training and years of field experience. ProLine is customer focused, consultative and unbiased in its product offerings, mechanical engineering services and installation approach. By utilizing ProLine's dedication and expertise, you can be confident in a complete and seamless radiant heat solution.

### Preeminent Consulting and Analysis

ProLine provides free, no obligation consulting services by experienced professionals to ensure that you'll receive a thorough, upfront analysis of your project. We evaluate every aspect of the system to offer the best, complete solution to meet your specific needs.

### Wide Selection of Proven Products

ProLine offers a wide selection of the industry's most reputable solutions - all at competitive pricing.

ProLine system components are at the top of their class, so you can be assured that your radiant heat system consists of the most trusted components. From boilers and manifolds to pumps and controls, your system will consist of the very best in each category.

### The Radiant Heat Information Authority

ProLine makes the process of finding, purchasing and installing radiant heat systems easy for construction professionals. ProLine works directly with installers to make these systems a reality.

### Complete Design and Engineering Services

You will receive a comprehensive set of engineering drawings that accurately describe each component of the system and give you a visual perspective on every key process. The hydronic services include:

- Tubing Installation (spacing, sizing, lengths)
- Manifold Placement
- Under Slab Insulation
- Distribution Line Installation (size, lengths)

### Mechanical Equipment

- Boiler Systems
- Pump Boards
- Pipe Configurations
- Controls

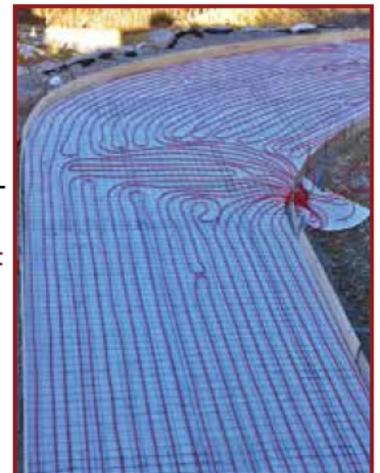

### Unmatched Installation Support

In addition to access to mechanical engineers and electricians, you can request an experienced radiant heat installer to come to your location and supervise the installation. Or, for a complete turnkey solution, you may request for ProLine to provide an entire hydronic installation crew.

*"By working with ProLine, I feel like I have the best radiant heat partner working with me, so I never feel alone during the installation process. The designer, engineer and electrician are always there for me if I have any questions or needs. Their expertise ensures that the installation goes smoothly and the customer is satisfied."*

## Your Complete Radiant Heat Solutions Provider

### Residential, Commercial and Industrial Radiant Heat Applications

#### Residential Snow Melting

- Heated Driveways
- Porches and Steps
- Ramps and Entry Ways
- Sidewalks, Patios and Custom Walkways
- Parking Areas
- Portable Snowmelt Solutions
- Custom Snow Melting Solutions

#### Radiant Heated Floors

- Radiant Heat for all Types of Floor Surfaces
- Retrofit Systems for Heating Existing Floors
- Hydronic and Electric Floor Heating Solutions
- Self-regulating Systems

### Included Services and Capabilities

- Free Professional Consulting (508-379-6038)
- Complete System Design and Engineering
- Industry-leading Customer Service
- Post-sales Technical Support
- Most Advanced, Proven Products
- Technical / Installation Support
- Free Product and Installation Training
- Free Quotes

#### Commercial Snow Melting

- Critical, High-traffic Areas
- Ramps and Loading Docks
- Outdoor Shopping Malls
- Sidewalks and Parking Areas
- Federal Government Facilities
- State Transit Authorities / Platforms
- Helicopter Pads
- Custom Snowmelt Applications
- Hydronic and Electric Snowmelt Systems

#### Roof Heating Solutions

- Complete Roof Deicing Systems
- Gutter Melt and Downspout Heating
- Roof Edge (Panel) Heating
- Most advanced Low-voltage Roof Heating

ProLine Radiant specializes in providing custom radiant heat systems to match the specific demands of your project. If you have any type of heating need, contact ProLine today and let us help.

*With its focus on preeminent customer service and a wide offering of proven products, ProLine Radiant has established itself as a leading provider of complete interior and exterior radiant heat solutions throughout the United States and Canada.*
